Add New Users Email Address, Click Next :

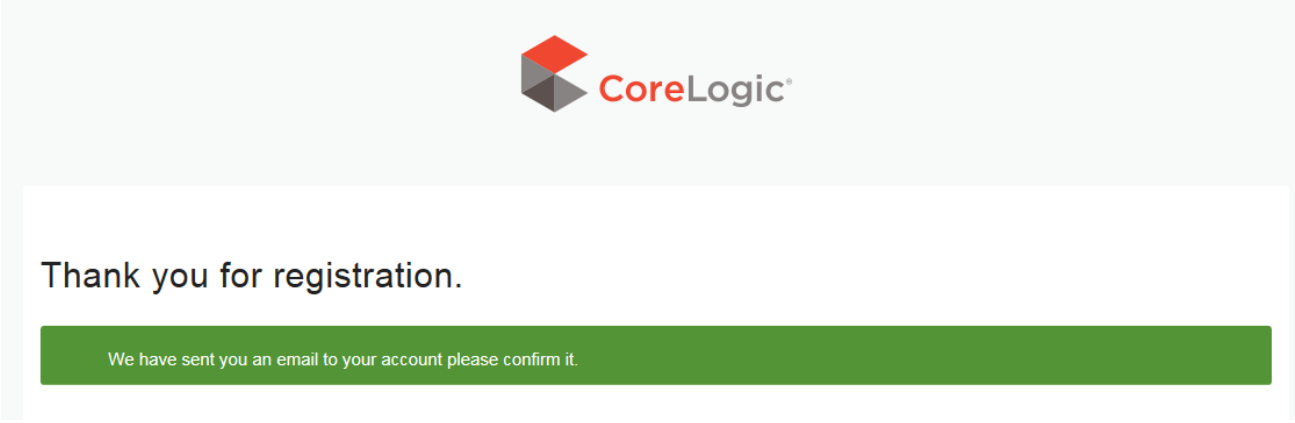

Complete New Users Contact Information, Create Default Password for New User
must include upper & lowercase letters, number, and special character

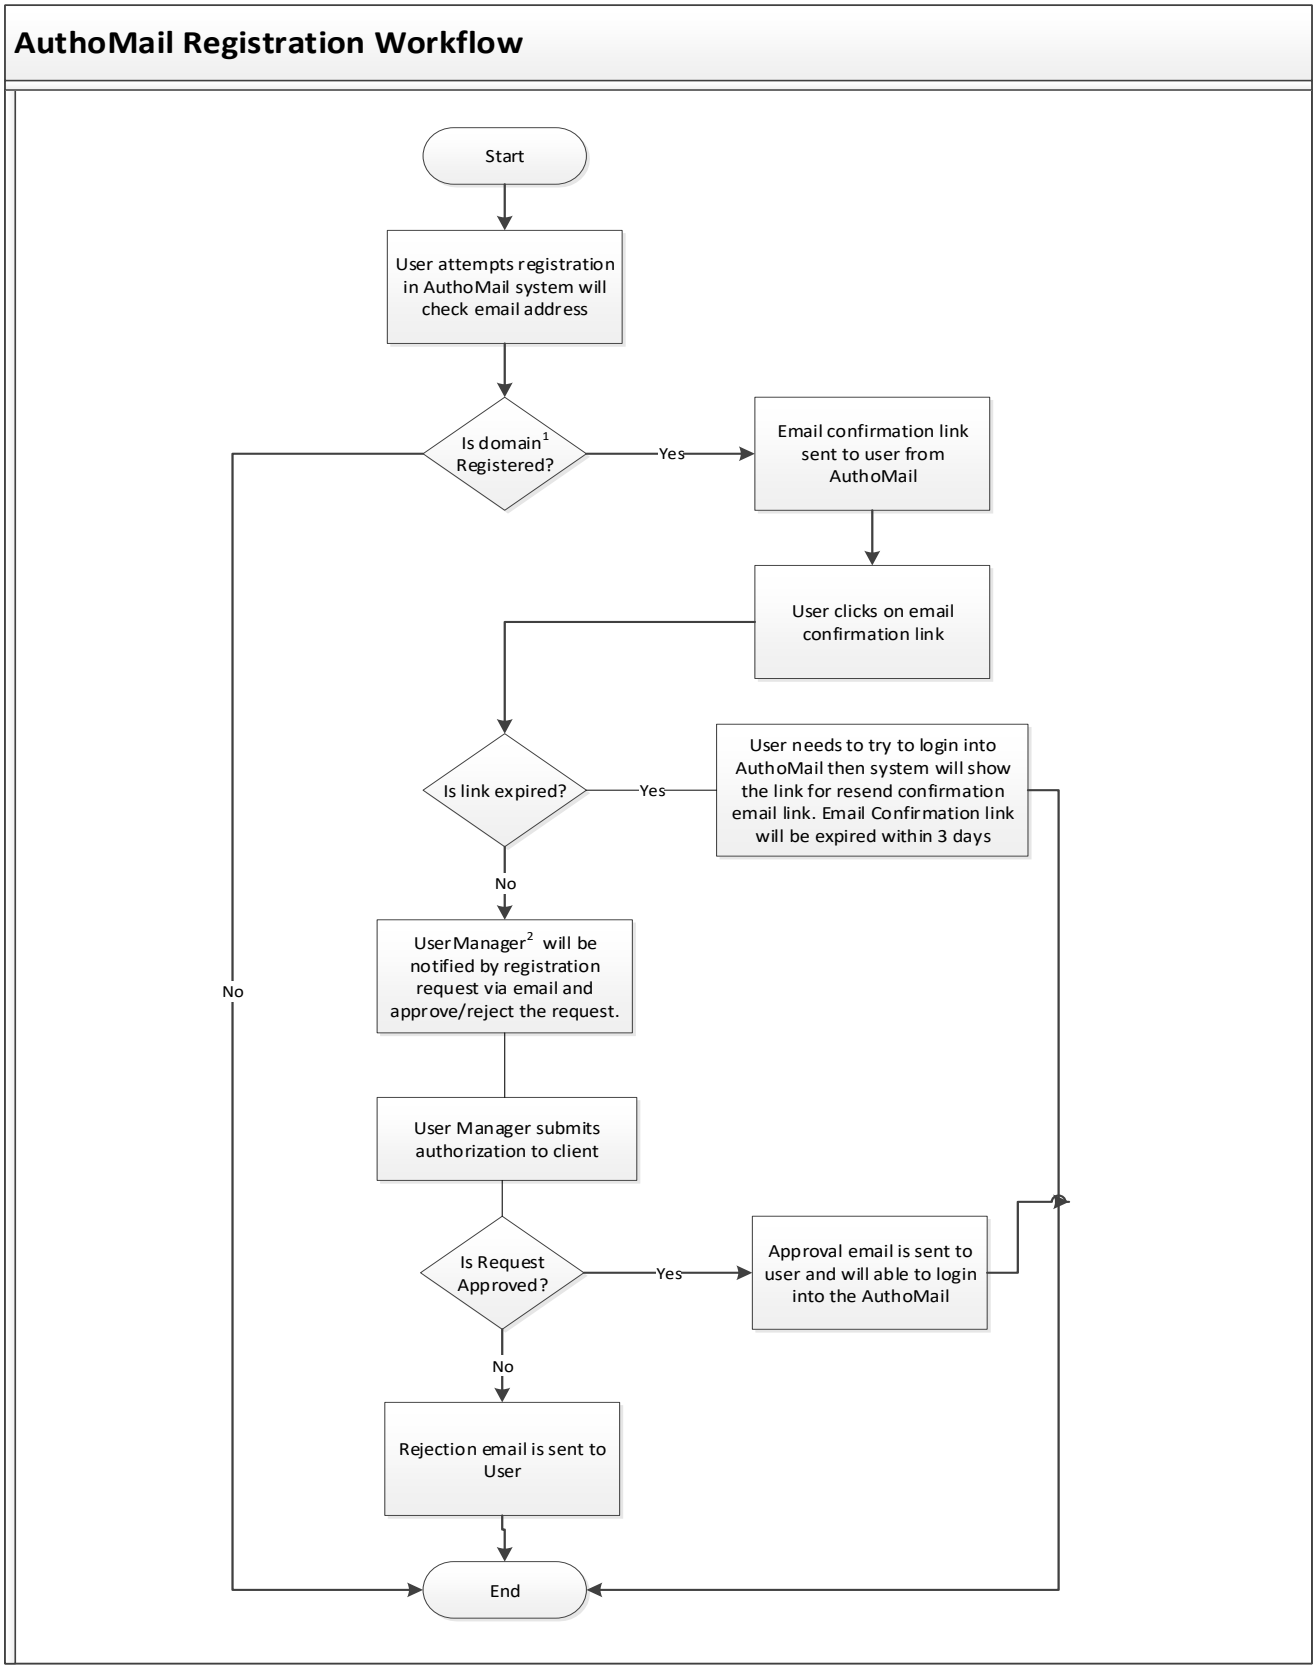

Click Register:

After Registered a Thank you email will appear, Next Steps SEE FLOW CHART BELOW

AuthoMail Registration Workflow

Authomail User Acceptance Specifics:

1. If the respective domain(s) are not registered in the AuthoMail system, then user with "outside" domain email address is not allowed to register.
    - For example, if, domain "corelogic.com" is not registered in AuthoMail and a user attempts to register with email address "user@corelogic.com" in AuthoMail then system will immediately restrict user, denying user the ability to register.
    - Authomail is a public site, with CoreLogic Information Security guidelines that can be viewed and accessed off network. However, user access is reserved only to configured client domain and authorized users (internal/client). e.g. corelogic.com etc.

2. **CoreLogic User Managers** are spavan@corelogic.com, brpatel@corelogic.com, geofernandez@corelogic.com

3. User can only login into the system once "User Manager" has approved access request.

4. Once a client user request(s) has been received by CoreLogic, A CL User will send a validation email to client to ensure the client user is to be added and / or denied.

    - Note: All users have the same level of access for the Authomail tool.
    - Note: The User will have 3 days to verify their information and register for the site before the verification link expires.

5. All denial requests for client users must be forwarded by client designated "Account Manager". After CL User Manager will send an immediate request to have the client user removed/purged from Authomail Tool – Requesting access.

    - Denied Users will be placed on a "User Removal List" to ensure user(s) cannot be added for future access to the tool. Published on Monthly "Vendor Scorecard".

6. List of clients – users will be reflected in Monthly "Vendor Scorecard" distribution PPT for monthly review.
